1: Microblading/ Nano Blading

Microblading and Nano Blading are both semi-permanent makeup treatments that enhance eyebrows by creating hairlike strokes. Both last up to 18 to 24 months.

Microblading may not be ideal for people with oily skin and large pores. Nano Blading hair strokes allows the pigment to go deeper in the dermis layer of the skin to retain clarity and crispness for long.

Zeb after consultation will perform 2 to 2.5 hr procedure giving a perfect shape to the eyebrows through mapping first and then completing the rest of the procedure after the client's consent.

4: Lip Blushing

Lip blushing is a semi-permanent makeup procedure that can have many benefits, including Improved lip symmetry, enhanced lip color, increased pigmentation, fuller looking lips, more youthful appearance, confidence boost and less make up. It can work well with a variety of skin tones, and the goal is often to enhance natural beauty rather than make lips look "made up". When you first leave the studio, your lips may look bright and have a lipstick effect, but they will soften and become more natural-looking as they heal.

5: Permanent Eye Liner

Many people opt for a permanent eyeliner treatment because it adds definition to the lash line – which can be great for those who have lost their lashes or want a subtle enhancement. The treatment is very popular with clients who may struggle to create symmetry in their makeup due to shaky hands or loss of vision. Permanent eyeliner does not smudge, fade, or need to be touched up every day like traditional makeup.

Zeb can create different eye liner looks preferred by the clients like winged, shaded liner, butterfly liner or lash enhancement that gives a subtle definition through the lash line with a soft blend.
